

Change IS GOOD. Change in your pocket IS BETTER.

Change for the sake of change isn't always good. Measured, managed change is necessary to sustain every good business. Production costs, weather and the economy are all signals that require beef producers to continually rethink marketing strategies and make change. Heterosis is a natural occurring risk management strategy and it's free. Change is good. Change in your pocket is better! **We hope you will join us February 28, 2012, Manhattan, KS for the Mill Creek Ranch the "Brand That Works" Production Sale.**
